

Precise Plastics Machinery

A division of Milacron Marketing Company, LLC.
Support Equipment System Design and Installation

Our goal is to make you more profitable, effective and efficient by using our skills in system design, installation and fabrication and by providing top quality refurbished primary processing and auxiliary equipment for the plastics

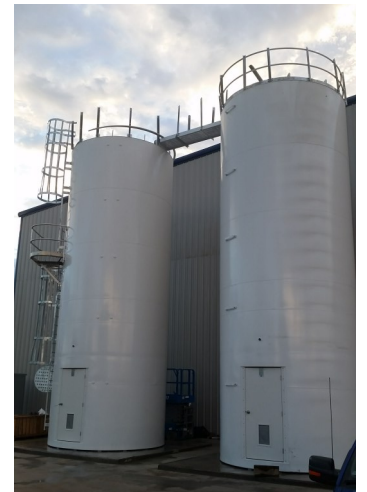

Quality Installations for better Maintenance...

All our installations have the past experience to make maintenance on piping to water systems easier to work on. Our background of maintenance to manufacturing engineers have included in the water systems to check and clean while still operating. Our built in temperature and pressure gauges help identify processing issues.

System Design and Installation...

Our knowledgeable staff has years of experience in manufacturing, processing, fabricating and other plant disciplines. We design and install central systems for material handling, process water, part conveyance, central drying, automation or whatever it takes to make your operation more successful.

Material Handling Components...

If full turnkey service is not an option, PPM is your source for tubing, bends, couplers, quick-change connectors, transitions, T's, everything you need to get your system up an running.

PPM

your place to go to get your facility up and running from conveying material to cooling machines.
